

**Public Works Department  
Month of January Summary**

This month we started it like the end of December fixing washouts and cleaning ditches from the heavy rain in December.

The weather took a turn back to winter which we had 10 events that we were out for. Some just snow others a mix bag of precipitation.

On the days with no weather, we were busy catching up on the cleaning and maintenance of the equipment. Also doing odd jobs that needed to be addressed.

We also received the new 6 wheel dump truck which will be in service shortly. HT-15 is out of service with a blown motor which is currently in the process of being replaced.

I've been working on budgetary numbers for 2024 road projects, and working with CIP for prioritizing other roads. I've also received a budgetary number for the Transfer Station dry storage roof and waiting on one for the sander hanger.

Thank you,  
Adam Dow, Interim Director of Public Works
